## DETAILED ACTION

1. Claims 1-5, 7-8 currently pending in the application.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-5 and 7-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Dorenbosch et al (US 2003/0235184 A1).

Regarding claims 1-4 and 8, Dorenbosch et al disclose a communication method, having a protocol suitable for bi-directional Voice over Internet Protocol (VoIP) communications with media streams including audio and/or video data, and based on a real-time transport protocol (RTP) Internet Engineering Task Force (IETF) Request for Comments (RFC) 1889, the method comprising:

Exchanging packets comprised of a header part and a payload part between at least two users, to form a RTP channel; and providing at least one sub-channel, which is embedded within the RTP channel, to carry command, signaling and/or information data, wherein the header part of each packet comprises at least one extension bit in a predetermined place to provide one or several additional fields in the header or in a header extension of said packets, to carry said command, signaling and/or information data (see abstract and figure 3, [0011], [0012], [0035], [0036], [0037],..

Regarding claim 5, Dorenbosch et al further teach wherein providing additional fields to carry said additional signaling data for transmission between users, for each transmitted packet, comprises setting the marker bit (305 of figure 3) and the extension bit (303), coding the payload type bits (payload type 306) with the information of the user to user signals, and providing a header extension following the normal RTP header (see figure 3), the additional fields comprises a profile indication filed (321), a length indication filed (322), a signaling type indication field (322) and several bytes for receiving the additional data to be carried, and the number of bytes correspond to the value of the content of the length indication field (see payload 312).

Regarding claim 7, Dorenbosch et al further teach wherein, upon reception of a RTP packet, the method further comprises analyzing the at least one extension bit in the header of the received packet, by a communication terminal of the user on the reception side, to take into account the command, signaling and/or information data contained in the additional fields of said header or header extension [0038], "In order to alert a receiving communication device to the presence of RTP floor control header extension 311, extension data field 303 of RTP floor control message 300 is embedded with a value of '1'."

**Conclusion**

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brenda Pham whose telephone number is (571) 272-3135. The examiner can normally be reached on Monday-Friday from 9:00 to 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Matar Ahmad, can be reached on (571) 272-7488.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (571) 272-2600.
